## THE SUBSTITUTE MINE TAX BILL

### The Subject of Yesterday's Heated Discussion

#### The Points of Difference Between It and the Original No 45.

The following is a copy of President Doran's substitute for his council bill 45, the subject of the discussion yesterday in the joint meeting of the council and house committees:

Be it enacted by the legislative assembly of the territory of Arizona:

Section 1. For the purpose of this act all mines and mining claims of whatever kind or character situated in the territory of Arizona shall be divided into two classes, as follows:

1. Productive mines and mining claims.

2. Non-productive mines and mining claims.

A productive mine or mining claim shall be:

(a) One that during the twelve months preceding the first day of January of each year beginning A. D. 1907, has produced ore or mineral products of any kind or character aggregating in value as fixed by section 4 of this act thirty-seven hundred and fifty dollars or more.

(b) A number of mines or mining claims located in the same mining district and under one ownership, from one, several, or all of which are produced during such year ore or mineral products of any kind or character aggregating in value, as fixed by section 4 of this act an amount equal to thirty-seven hundred and fifty dollars or more per claim.

All other mines and mining claims shall be classed as non-productive.

Section 2. Every person, corporation, partnership or association engaged in mining upon any mine or mining claim of any kind or character, shall, between the first day of January and the first Monday in May in each year, make out a statement of the above-named ore or mineral products from each mine or group of mines owned or worked by such person, corporation, partnership or association during the twelve months next preceding the first day of January in each year, derived from the working thereof. Such statement must be verified by the oath or affirmation of such person or the manager, superintendent or agent of such corporation, partnership or association and must be delivered on or before the first Monday in May of each year, to the assessor of the county in which such mine, mines, or mining claim or claims are situated, and to the auditor of the territory. Said statement shall show the following:

The name and the address of the owner.

The description and location of the mine, mines, mining claim or claims, covered by said statement, giving the name, area in acres, mining district and county. If there is no mining district established, then the location with relation to the nearest established district.

The number of tons of ore or other mineral products extracted from said mine or mining claims during the period covered by the statement.

The amount and character of such ores or mineral products and the yield of such ores or mineral products in constituents of commercial value, that is to say, the number of ounces of gold, silver and the number of pounds of copper, lead, or other commercially valuable constituents of said ores or mineral products during the period covered by the statement.

Section 3. The assessor of such county shall prepare on or before the first Monday in May of each year an assessment roll called the "Assessment Roll of the Gross Product of Mines and Mining Claims," alphabetically arranged, in which shall be listed the gross product of all the mines and mining claims in his county, and in which shall be specified in separate columns and under the following heads:

1. The name and address of the owner of the mine or mining claim.

2. The description and location of such mine or mining claim, stating therein the name, area in acres, mining district and county. If there is no mining district established, then its location with relation to the nearest established district.

3. The yield of such ores or mineral products in constituents of commercial value, that is to say, the number of ounces of gold, silver and the number of pounds of copper, lead, or other commercially valuable constituents of said ores or mineral products during the period covered by the statement.

This statement shall also give the value of the same in money during the period covered by the statement, such value in money to be determined as provided in section 4 of this act.

The form of said assessment roll, as well as the form of the statement provided for in section 2, shall be prepared by the public examiner in conformity with the provisions of this act, and he shall furnish said form to the assessor of each county in order that such forms may be uniform throughout the territory.

Section 4. The total amount of taxes, to be ascertained as hereinafter provided.

Section 5. It shall be the duty of the assessor to ascertain the value of these products as follows: He shall compute the value thereof, based upon the average market quotations of each of such products in New York City as evidenced by some established authority or market report such as the "Engineering and Mining Journal" of New York City, or any other standard paper giving the market reports for the next preceding year, and twenty per cent of such gross value in money shall constitute the total amount upon which the levy of taxes for the current year shall be fixed and made. And said assessor shall return twenty per cent of such gross value as the assessment upon which the levy of taxes shall be made upon the claim covered by said statement.

Section 6. In the event of the owner of any such productive mine or mining claim being dissatisfied with the valuation fixed by the assessor or by

any board of equalization, such owner shall have a right to appeal from the valuation as finally fixed, to the district court of the county in which said mine or mining claims is situated, in the manner provided for in paragraph 3875 (Sec. 45), Revised Statutes of 1901, and subject to all the conditions and requirements of said paragraph 3875, including the prepayment of taxes. The only issue to be tried by said court upon such appeal is whether the true average value according to quotations above mentioned was correctly found
